

# “Periodontal Medicine and the Expanding Role of the Dental Hygienist”

## Judy Carroll, RDH

### Recent feedback...

*“LOVED this woman!! Excellent presentation would love to see her share with periodontists.”*

*“Good job Judy! WOW!” “Please have Judy Carroll back soon – the best class in many years!”*

### About Judy Carroll

As a national speaker, author, and clinical instructor, Judy Carroll, RDH is also Founder and Clinical Director of PerioPeak Innovations, a revolutionary periodontal disease treatment facility located in Washington state. Her pioneering treatment protocol of Regenerative Periodontal Endoscopy (RPE) is lauded among dental industry professionals and attracts patients from across the globe.

With more than 29 years of clinical experience, Judy is an expert in endoscope methodology as well as experience and clinical autonomy. She is fueled by a passion for more comprehensive and preventative methodologies, coupled with an emphasis on integrative oral-system strategies. In addition, she recently won a major lawsuit against the Washington State Department of Health, redefining the scope of practice for dental hygiene and setting an important precedent for her profession.

### Periodontal Medicine and the Expanding Role of the Dental Hygienist

Peek into the future of clinical dental hygiene with an introduction to targeted and more effective strategies in non-surgical periodontal therapy. Attendees will also learn to identify and therapeutically-address risk factors for chronic periodontal inflammation. This four-hour course will:

- Introduce innovative approaches to periodontal endoscopy, systematic piezo root instrumentation, host-modulated therapy, regenerative proteins, salivary diagnostics, and integrative care using a multidisciplinary approach;
- Help attendees identify and understand periodontal pathogenesis through hidden risk factors generally missed in every-day clinical practice;
- Share examples of “hopeless” cases saved through advanced synergistic and integrative treatment;
- Offer numerous practical applications that strengthen periodontal therapy programs while increasing production, patient satisfaction, and professional growth;
- Re-define the dental hygiene scope of practice by exploring a more significant role in co-therapy.
